

## Plan of the Day for Saturday, 8 June 2013

Submitted by wpetersen on Sat, 06/08/2013 - 09:26

Date:

Saturday, June 8, 2013 - 09:15

Discussion:

Rain is expected this evening in the area (already in NW Iowa). XPOLs, D3R and Disdro/Gauges are up but NPOL is down. We will work to get NPOL back up today, but failing that, we will still operate with D3R and XPOLs tonight. 2DVD comms still need to be repaired for 1/2 of the 2DVD's so, that work will also be ongoing today and instruments will be checked to ensure they are collecting data (everything appears ok in that regard, however). A GOES RSO will be requested for this evening beginning at 0000 UTC and ending at 1200 UTC on 6/9.
